RESEARCH INTERESTS: Machine Learning, Malware Analysis, Network Security

EDUCATION

University of Maryland, Baltimore County (UMBC)

Ph.D. in Computer Science (Expected Spring 2018)
> Dissertation Title: Detecting and Quantifying Bias in Malware Datasets
> Graduate GPA: 4.0/4.0

M.S. in Computer Science (Fall 2014)
> Thesis Title: Quantum Classification of Malware

B.S./B.S./B.A. *cum laude* in Computer Science/Mathematics/Philosophy (Fall 2011)
> Undergraduate GPA: 3.70/4.00, Certificate of General Honors

WORK EXPERIENCE

ZeroFOX

Data Scientist → Senior Data Scientist, September 2015 - Present

- Created high-quality datasets and classifiers for product offerings.
- Led development of SNAP_R, a machine learning based pen-testing tool to automate generation of individually tailored phishing messages on Twitter.
- Piloted ZeroFOX FoxThreats program for threat hunting on social media.
- Conveyed complex machine learning concepts to leadership, press, and conference attendees.
- Interviewed and mentored new hires.

CyberPoint International, LLC

Student Intern, Summer 2015

- Researched bleeding-edge malware classification techniques and integrated them into the CyberPoint Machine Learning Model Training Pipeline.
- Created algorithm and data structure vulnerabilities for DARPA STAC competition.

University of Maryland, Baltimore County

Graduate Research Assistant, UMBC DREAM Lab, January 2014 - May 2015

- Scraped urlquery.net for links to websites redirecting to exploit kits.
- Intercepted and recorded traffic to exploit kit landing pages for use in data analysis.

Graduate Teaching Assistant, August 2012 - December 2013

- Teaching Assistant for Network Security, Computer Security, Cryptography, Automata Theory, and Introduction to Object-Oriented Programming.
- Taught Metasploit, Kali Linux, and infosec theory to undergraduate students.

Graduate Research Assistant, UMBC Cyber Defense Lab, January 2012 - August 2013

- Designed, deployed, and maintained LAMP stack to host government-funded gamification initiative for teaching high school students basic concepts in infosec.

Army Research Lab

Student Intern, Summer 2014

- Transformed satisfiability problems into problems the D-Wave SR10V6 could solve.
- Demonstrated and reduced bias in D-Wave chips using statistical techniques.

Pyxis Engineering/Applied Signals Technology

Associate Engineer, June 2009 - January 2010

- Designed and deployed a Training Request Management System.

PUBLICATIONS

- John Seymour,"Hacking a Corporate Social Media Page", ZeroFOX white paper, December 2016.

- John Seymour and Charles Nicholas,"How to build a malware classifier [that doesnt suck on real-world data]", SecTor, October 2016. Also presented at Data Science MD (October 2016), Invincea (February 2017).

- Philip Tully, John Seymour, and Spencer Wolfe, "Post Grams Not Scams: Detecting Money Flipping Scams on Instagram Using Machine Learning", ZeroFOX white paper, September 2016. Covered by BBC News, NBC News, TechCrunch, and The Verge, among others.

- John Seymour and Philip Tully, "Weaponizing Data Science for Social Engineering: Automated E2E Spear Phishing on Twitter", Black Hat USA, August 2016. Also presented at DEF CON 24 (August 2016), CyberGamut (December 2016), BrightTalk (December 2016), Baltimore Python (July 2016). Covered by The New York Times, The Atlantic, MIT Technology Review, and Forbes, among others.

- John Seymour and Charles Nicholas, "Labeling the VirusShare Corpus: Lessons Learned", BSidesLV, August 2016. Also presented at SPARSA South (July 2016), Baltimore Python (June 2016).

- Alan T. Sherman, John Seymour, Akshayraj Kore and William Newton, "Chaum's protocol for detecting man-in-the-middle: Explanation, demonstration, and timing studies for a text-messaging scenario", Cryptologia, May 2016.

- John Seymour and Charles Nicholas, "An Introduction to Malware Classification", BSidesCharm, April 2016.

- John Seymour and Charles Nicholas, "Quantum" Classification of Malware, DEF CON 23, August 2015. Also presented at CyberPoint International (July 2015), UMBC DREAM LAB (July 2015).

- John Seymour, "Overgeneralization in Feature Set Selection for Classification of Malware", CSEE Technical Report 14-06, August 2014. Also presented at Malware Technical Exchange Meeting (June 2015, poster session), CyberPoint International (July 2015).

- Marc Olano, Alan Sherman, Linda Oliva, Ryan Cox, Deborah Firestone, Oliver Kubik, Milind Patil, John Seymour, Isaac Sohn, and Donna Thomas, "SecurityEmpire: Development and Evaluation of a Digital Game to Promote Cybersecurity Education," USENIX 3GSE, August 2014.
